

Special builds

Specials/Engineering

Thompson Valves (IVP) offers a full bespoke design service from conception to completion.

With our highly experienced team we can take your initial concept idea to size and specify a standard product, or a stand alone bespoke special to meet your exact requirements.

Once a specification is reached, we shall provide a 3D model and 2D drawings for discussion purposes and final approval. Once approved, a quotation for the final product and an applicable spares kit shall be provided.

All of our standard and special products come with a full 12 month warranty.

Special build examples

Fig.1

Skid mounted 2 stage pressure reducer for a Nitrogen Blanketing System.

Fig.2

2 stage Gas Turbine engine start for Naval Application.

Fig.3

4" High pressure filter for Nitrogen System.

Fig.4

Gas Turbine start for a Natural Gas System.

Fig.5

High pressure Air Manifold for Naval Application.

Fig.6

Base mounted J50 regulator for High Pressure filtration.
